

Opening for Research Associate (KOREA)

[PhAST](#) is a venture-backed, seed-stage AI healthcare startup developing computer vision technology for combating antibiotic resistant bacteria. Our platform provides clinical decision support for doctors, workflow improvement for hospitals, and helps accelerate the drug development process for pharmaceutical companies. The Company is headquartered in the biotech innovation hub of Boston (USA), Data Sciences team based in Zurich (Switzerland), and now expanding to South Korea to establish our Asian R&D site.

Job Description. We are seeking a talented and driven full-time Research Associate (RA) with training in microbiology and sterile techniques to join PhAST's Korean team. The successful candidate must be skilled in wet lab work and passionate about developing AI diagnostic technology in an early-stage startup. This opening is for a position in Bundang/Pankyong, South Korea.

Responsibilities:

- Assisting senior research scientist(s) in bench work and in applying PhAST's technology.
- Performing minimum inhibitory concentration testing on BSL2 isolates
- Maintenance of PhAST's bacterial strain bank
- Developing and following technical protocols

Qualifications:

- B.Sc. in microbiology/molecular biology
- Demonstrated wet-lab skills (experience with BSL2 pathogens a plus).
- A desire to overcome technical hurdles through creativity and dedication.
- Desire to work in a fast-paced and highly collaborative environment with a world-class team.

The position is available immediately. Salary and equity entitlement options will be based on commitment and experience. If interested, please email your resume and a cover letter to info@phast.ai
